

PageLedger — a mark for the page-denominated ledger

Archival & scholarly, but contemporary. The motif fuses the two ideas the package is built on: the *page* as the canonical unit, and the *ledger* that tallies, routes, and audits it. Type is Archivo (a literal nod to the archive) with JetBrains Mono for the technical voice.

01 — SYMBOL DIRECTIONS four ways to draw “a counted page”

A · TALLIED PAGE

B · RULED LEDGER

C · UNIT STACK

02 — LOCKUPS icon + wordmark · direction A as primary

PRIMARY · HORIZONTAL

INK · #1F1B16

BRICK · #B0432F

GREEN · #3E6B4F

OCHRE · #A9762A

GITHUB / PYPI HEADER

pageledger

a page-denominated run ledger for document extraction

```
$ pip install pageledger
```
